SWOSU Summer Science and Mathematics Academy

Twenty-six high school students attended the Summer Science and Mathematics Academy July 11-22 at Southwestern Oklahoma State University in Weatherford.

The academy, funded by SWOSU and a grant from the Oklahoma State Regents for Higher Education, was for high ability sophomores, juniors and seniors.

Dr. Brian Campbell, director of the academy, said the purpose of the academy is to expose students to the close relationship between science, mathematics, technology and society. And, the program is designed to motivate the participants to pursue higher education and careers in science, mathematics and technology.

The students studied academic science units offered in biology, chemistry, geology, space science, health, physics, mathematics and computer science. The students also participated in laboratory activities, field experiences and a problem-solving competition. Additional enrichment activities were scheduled throughout the academy.
